Presenting the solution for starter cultures and research and development

- Safe starter culture preparation, holding and transfer
- Automatic cultivation process with minimal manual or intrusive operations
- Transparent and easy process control and data logging

AUTOMATED FEATURES
- pH and temperature control
- Harvest and media feed
- Light control
- Nutrition dosing

HIGH PROCESS INTEGRITY
- Sterile media supply
- Sterile Air and CO₂ supply
- Sterile Nutrient supply
- Sterile sampling unit

Data sheet (excerpt)
- Cultivation volume 6 l
- Temperature range 5 to 40°C
- LED - programmable illumination with up to 1900 µmol m⁻² s⁻¹
- Filter pore size 0.2 µm
- Air supply up to 0.3 m³ h⁻¹
- CO₂ supply 0.001 to 0.03 m³ h⁻¹
